📍 Amaravathi, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Passionate Computer Science student and aspiring Java Backend Developer with strong foundations in OOP, data structures, and algorithms. Target-driven learner focusing on building robust backend systems, RESTful services, and learning scalable system design. Eager to contribute foundational engineering skills and collaborate effectively as a backend development intern.

EDUCATION

VIT-AP University

Amaravathi, India

Bachelor of Technology (B.Tech), Computer Science and Engineering (CGPA: 8.00 / 10)

Expected 2028

- **Relevant Coursework:** Data Structures, Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

TECHNICAL SKILLS

Languages: Java, SQL, HTML, CSS, JavaScript

Backend: Spring Boot (Learning), Spring MVC, REST APIs, JDBC

Databases: MySQL, PostgreSQL

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Maven

Concepts: Object Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, Operating Systems

PROJECTS

TeamFlow

- Engineered a team collaboration platform using **Java**, **Spring Boot**, **MySQL**, and **REST APIs**.
- Implemented user authentication and role-based access control alongside an interactive metrics tracking dashboard.

Smart Farmer Assistance System

- Built a web application leveraging a **Java** backend, **MySQL**, **HTML**, **CSS**, and **JavaScript** to assist regional farmers.
- Integrated dynamic features including automated crop recommendations, weather updates, and national market price tracking.

CERTIFICATIONS

Java Programming – Foundational mastery over core object-oriented principles, runtime environments, and exception handling.

SQL – Strong knowledge of relational database query structure, entity management, complex joins, and query logic.

Git & GitHub – Proficient in version control systems, standard branching mechanisms, repositories, and distributed collaboration.

Spring Boot Framework – Actively studying container lifecycle patterns, bean configuration, and REST API development.

ACHIEVEMENTS

- Built functional academic software projects validating core architectural design concepts and backend workflows.
- Continuously refining foundational Data Structures, Algorithms, and analytical problem-solving skills through daily code practice.
